

FIBERBUILT ENGINEERED PIGS

DO YOU HAVE A DIFFICULT OR UNPIGGABLE PIPELINE?
YOU'VE COME TO THE RIGHT PLACE.

Fiberbuilt pigs are built to perform in extreme conditions. Our specialized pigs are engineered for demanding applications such as restrictions, diameter changes, high- or low-flow conditions, and extreme environments.

Get in touch to discuss solutions you may not have thought possible. Even if we aren't your first call, **we're confident we can be your last.**

PIGGING CAPABILITIES

1

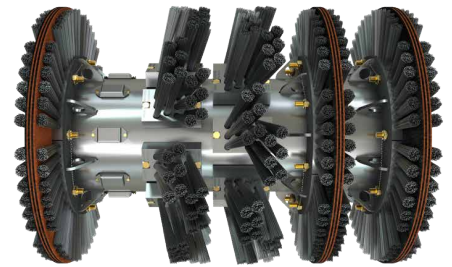

**Problematic
Cleaning**

2

**Radical
Multi-Diameters**

3

**Extreme
Environments**

OUR PIGS SUCCESSFULLY NAVIGATE THE MOST DIFFICULT PIGGING ENVIRONMENTS

Radical Multi-Diameters

- Ideal For Small-Diameter and Multi-Diameter Pipelines
- Aggressive Bends
- Schedule Transitions
- Difficult Geometries

Problematic Cleaning

- Corrosion Pit Cleaning with Patented Corrosion Killer® Technology - Removes 80% More Debris From Deep Corrosion Pits
- Black Powder Removal with Magnetized Brushes
- Descaling
- Jetting & Bypass (Speed Adjusted)
- Steel, Poly, or Composite Pipe

Extreme Environments

- Steam
- Hot Bitumen
- Diluents
- Dilbit Mixtures (Aromatics, H₂S, CO₂)
